Powers of 10: the exponent counts the places

10^{-3}	10^{-2}	10^{-1}	10^{0}	10^{1}	10^{2}	10^{3}	10^{6}
0,001 3 places after the comma	0,01 2 places	0,1 1 place	1 no zeros	10 1 zero	100 2 zeros	1000 3 zeros	1 000 000 6 zeros

← **smaller than 1: negative exponent**

bigger than 1: positive exponent →

Positive exponent 10^n: a **1** followed by **n zeros**.
10^4 = 10 000

Exponent zero: 10^0 = **1**
(any number to the power of 0 is 1)

Negative exponent 10^{-n}: the **1** is in the **n-th** place after the comma.
10^{-4} = 0,0001
