The prefix staircase (length, mass and capacity)

From tera to kilo: jumps of 1000

Going **DOWN** one jump: the number gets 1000 times bigger.
Going **UP** one jump: the number gets 1000 times smaller.

From kilo to milli: steps of 10

Going **DOWN** one step: the number gets 10 times bigger.
Going **UP** one step: the number gets 10 times smaller.

From milli to pico: jumps of 1000

Going **DOWN** one jump: the number gets 1000 times bigger.
Going **UP** one jump: the number gets 1000 times smaller.

Examples: 1 km = 10^5 cm (5 steps of 10) · 1 mm = 1000 µm (1 jump of 1000) · 1 Gm = 10^6 km (2 jumps of 1000).
