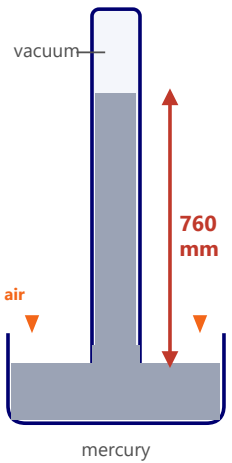
Different units for the same quantity

Pressure: Torricelli's barometer



The air pushes the mercury up to a height of 760 mm at sea level.

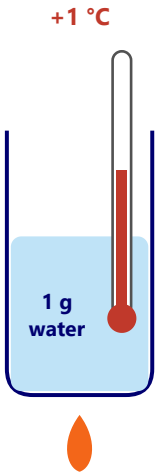
1 atm = 760 mmHg

1 atm = 101 325 Pa

1 mmHg ≈ 133.3 Pa

SI unit: pascal (Pa)

Energy: calories and joules



A **calorie** is the energy needed to heat 1 g of water by 1 °C.

1 cal = 4.18 J

1 kcal = 10^3 cal = 4180 J

SI unit: joule (J)

Food labels use kcal and kJ.
