We can only change between units of the SAME quantity

✓ YES: same quantity

Length	km ⇄ m ⇄ cm	multiples and submultiples
Mass	kg ⇄ g ⇄ mg	multiples and submultiples
Time	h ⇄ min ⇄ s	different units, same quantity
Volume	dm^3 ⇄ L ⇄ mL	different units, same quantity

✗ NO: different quantities

km ✗ kg		length ≠ mass
s ✗ m		time ≠ length
L ✗ g		capacity ≠ mass
m^2 ✗ m^3		surface ≠ volume

Before changing a unit, ask yourself: **"Do both units measure the same quantity?"** If the answer is **no**, the change is **impossible**.
