# How do we classify matter?

## MATTER

### Pure substance
only ONE substance · fixed properties

#### Simple substance
one type of atom

gold (Au) · oxygen ($O_2$)

#### Compound
two or more types of atom

water ($H_2O$) · salt (NaCl)

### Mixture
TWO or more substances · they can be separated

#### Homogeneous
looks the same everywhere

salt water · air · steel

#### Heterogeneous
we can see different parts

granite · salad · sand + water
