A solution: solute + solvent

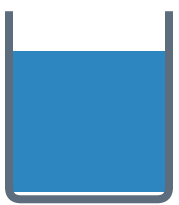

SOLUTE
the smaller amount
(salt)

SOLVENT
the larger amount
(water)

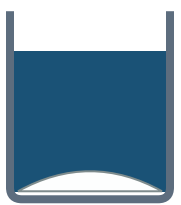

SOLUTION
homogeneous mixture
(salt water)

Dilute
little solute

Concentrated
a lot of solute

Saturated
no more can dissolve

The solution has the same state as the solvent.

- gas in liquid (fizzy drink)
- gas in gas (air)
- solid in solid: **alloys** (steel = iron + carbon)
