Worked example 1: sand + salt + iron filings

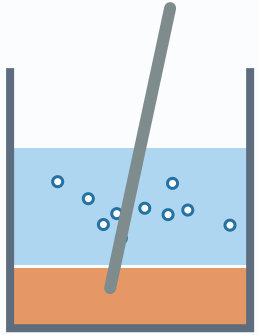

Mixture: sand, salt and iron filings · **Goal:** we want to obtain the **three** components

1

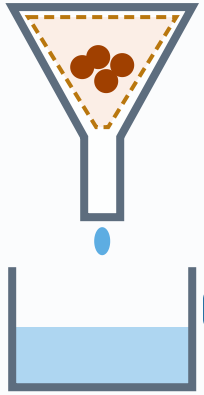

Magnetic separation: the magnet takes out the iron filings.

2

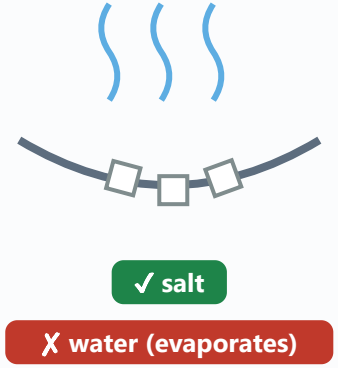

Add **water** and stir: the salt **dissolves**, the sand does not.

3

Filtration: the sand (residue) stays on the paper; the salt water (filtrate) goes on.

4

Evaporation: the water evaporates and the salt crystals remain.

✓ KEEP what we want to obtain → NEXT goes on to the next step ✗ DISCARD we do not need it
