# How fast do things move?

**Snail** — **0.01 m/s** = 0.04 km/h

**Walking person** — **1.4 m/s** = 5 km/h

**Cyclist** — **6 m/s** = 22 km/h

**Cheetah** — **30 m/s** = 108 km/h

**Car on a motorway** — **33 m/s** = 119 km/h

**Formula 1 car** — **88 m/s** = 317 km/h

**Plane** — **250 m/s** = 900 km/h

**Sound in air** — **340 m/s** = 1224 km/h

$$\text{speed} = \frac{\text{distance travelled}}{\text{time taken}}$$ · SI unit: **m/s** · 1 m/s = 3.6 km/h
