**Amoníaco**

**$NH_3$**

molécula de partida

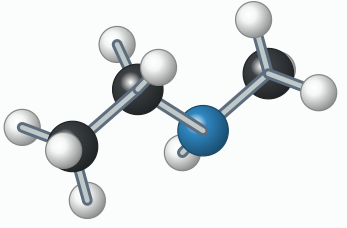

**Amina primaria: R–$NH_2$**

**etilamina: $CH_3$–$CH_2$–$NH_2$**

se sustituye un H

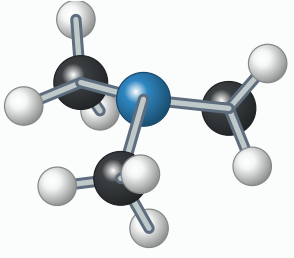

**Amina secundaria: R–NH–R'**

**N-metiletilamina**

se sustituyen dos H

**Amina terciaria: RR'R"N**

**trimetilamina: $N(CH_3)_3$**

se sustituyen los tres H
