Which element is written on the right?

IUPAC element sequence: the one further to the right goes on the right of the formula

The element **further to the right** in the sequence is written **on the right** of the formula…

$NaCl \cdot Fe_2O_3 \cdot NH_3 \cdot H_2S \cdot OCl_2 \cdot OF_2$

…and in English it is named **last**: **root of its name + ide**.

NaCl → sodium **chloride** · Fe_2O_3 → diiron tri**oxide**

OCl_2 → oxygen di**chloride** · OF_2 → oxygen di**fluoride**
