What type of compound is it?

Look at what is on the right of the formula

on the right	metal and on the right	on the right	H on the left	another non-metal on the right
O	**H**	**OH**	**H + F, Cl, Br, I, S**	**F, Cl, S, N…**
oxide	**hydride**	**hydroxide**	**hydrogen …ide**	**…ide**
CO_2, Fe_2O_3	NaH, CaH_2	NaOH, $Ca(OH)_2$	HCl, H_2S	NaCl, PCl_3

H_2O water | **NH_3** ammonia | **CH_4** methane | These three have their own names!
